Pidel Sitorus

---

## Introduction

Computer Technology graduate from Institut Teknologi Del with experience in database support and cloud infrastructure. Currently working as an IT Support Database at Indomaret Group, supporting database monitoring, backup verification, replication monitoring, and basic troubleshooting across database environments. Previously worked as a Cloud Systems Engineer Intern, developing an Edge Cloud Gaming Platform using Kubernetes, GPU virtualization, Python, and REST APIs. Interested in database systems, cloud infrastructure, system automation, and DevOps.

## Education

### Del Institute of Technology

2022 - 2025 · Graduated September 2025

## Technical Skills

**Database** : Oracle · MySQL · PostgreSQL · SQL Server

**Linux & Infrastructure** : Linux · Virtual Machine · SSH · VirtualBox · VMware - monitoring

**Cloud & DevOps** : Docker · Kubernetes · GitHub · Git · AWS · Terraform · GCP · Ansible

**Programming & Web** : Python · PHP · JavaScript · HTML · CSS · Flask · Laravel

**Automation & Monitoring** : Windows Batch · Backup Automation · Prometheus · Grafana

## Projects

### Backup Checker Automation

Windows Batch · SSH · Linux

Automated backup verification for Linux database servers. The tool reads a predefined server list, connects to database servers through SSH, checks backup files, and identifies potential backup failures.

### DevOps Inventory API

Python · FastAPI · PostgreSQL · Docker · Docker Compose

REST API project developed to practice application deployment, containerization, and DevOps workflows. The project uses FastAPI, PostgreSQL, Docker, and Docker Compose.

### Edge Gaming Cloud Computing

Python · Flask · Kubernetes · GPU Virtualization

Edge gaming cloud platform developed during internship at PT PAN Solusi Indodata, focusing on low-latency game streaming through GPU virtualization and Kubernetes orchestration.

### Toba Batak Souvenir Information Website

WordPress · PHP · MySQL

CMS-based souvenir catalog website developed as part of a three-member team, using MySQL as the backend.

## Experience

### IT DBA Support | Indomaret Group | Sep 2026 - Present

- Monitor database availability and system status across database environments.
- Perform database backup verification and monitor backup status.
- Monitor database replication and replication lag.
- Perform basic troubleshooting for database and infrastructure-related issues.
- Escalate database issues to the DBA team when required.
- Work with database environments including Oracle, MySQL, and PostgreSQL.

### Cloud Systems Engineer | PT PAN Solusi Indodata | Jan 2025 - Jul 2025

- Built and managed an Edge Cloud Gaming Platform focused on low-latency game streaming using GPU virtualization and Kubernetes-based orchestration.
- Developed a REST API backend using Flask and Python to interface with Kubernetes and automate game server deployment.
- Developed a web interface using HTML, CSS, and JavaScript for server package selection and deployment results.
- Worked with NVIDIA vGPU, containerd, and Sunshine/Moonlight for cloud gaming workloads.
- Used Kubernetes for orchestration, autoscaling, load balancing, and failure recovery.
- Configured persistent storage using NFS for game files and user configurations.

## Certification

### Docker, DevOps & Kubernetes

- Docker Foundations Professional Certificate — Docker, Inc. · Jun 2026
- Learning Docker — LinkedIn · Jun 2026
- Learning Docker Compose — LinkedIn · Jun 2026
- Docker: Your First Project — LinkedIn · Jun 2026
- DevOps Foundations — LinkedIn · Jun 2026
- DevOps Foundations: Continuous Delivery/Continuous Integration — LinkedIn · Jun 2026
- DevOps Foundations: Infrastructure as Code — LinkedIn · Jun 2026
- Certified Kubernetes Administrator (CKA) Cert Prep — LinkedIn · May 2026

### Linux & DevOps

- Introduction to DevOps and Site Reliability Engineering (LFS162) — The Linux Foundation · Nov 2025 · Expires Nov 2027
- Introduction to Linux (LFS101) — The Linux Foundation · Nov 2025 · Expires Nov 2027

## Organization

### Del Cyber Security Club — Member | Nov 2023

- Practiced security scanning using NMAP and Nikto on Kali Linux.
